

Sioux™-Style Replacement Seat Grinder Motors

Kwik-Way seat grinding motors are durable and designed to provide lasting accuracy in all seat grinding applications

SGH-SX 45° Electric Motor Unit

Our world famous seat grinder motor is now available with the Sioux™ STAR driver. 11,500 rpm, high-torque motor unit delivers the power you need for fast and accurate seat grinding.

034-3100-21 SGH-SX, 115V
034-3100-28 SGH-SX, 230V

SGA-SX Inline Air Motor Unit

High quality, heavy duty air motor unit rated at 11,500 rpm; for fast, effective seat grinding. Equipped with the Sioux™ STAR driver. (Requires 6-8 CFM @ 90 psi)

034-3100-41 SGA-SX

SGL-SX Aviation Electric Motor Unit

Extended reach motor unit designed to replace the out-of-production Sioux™ aviation unit. Works well on most Lycoming and Continental engine configurations and applications where the valve guides are fairly parallel to the cylinder bore. Equipped with the Sioux™ STAR driver.

034-3030-19 SGL-SX, 115V
034-3030-20 SGL-SX, 230V

Valve Refacer Wheels

High Quality Valve Refacer Wheels to fit your Sioux™ Valve Refacer. Manufactured using our proprietary formula by the world's largest abrasive company.

Try one and see for yourself why our abrasives lead the industry for finish, quality and longevity.

Carbide Pilots

Kwik-Way also offers a full range of carbide .385 top size pilots for your seat cutting applications.

Sioux™-Style Stone Holders

Precision machining and high quality bearings make this one of the best Sioux™-style stone holders available today.

Manufactured, assembled and tested in Marion, Iowa by our skilled craftsmen.

034-1702-00 Stone Holders

General Purpose Stones

Deliver a good finish on a wide range of valve seat materials.

Hard Alloy Stones

Will grind the hardest of valve seats with little difficulty.

Finish Stones: For a glass-smooth finish.
